## WEST AFRICAN COLLEGE OF CLINICAL PHYSIOLOGY SCIENCES (WACCPS)

### Overview:

The West African College of Clinical Physiology Sciences (WACCPS) is a specialized professional training organization dedicated to promoting excellence in clinical physiology practice, education, and research in West Africa. As a leading professional institution in the region, we strive to maintain the highest standards of clinical physiology practice, foster collaboration and innovation, and improve healthcare outcomes for the people of West Africa. Our registrants comprises provisional clinical physiologists, clinical physiologists, healthcare professionals, and researchers who learn and share a commitment to advancing the field of clinical physiology and improving patient care.

### Aim and Objectives

The aim and objectives of WACCPS are:

**Developing and Delivering Bespoke Educational Programs:** We create comprehensive, evidence-based professional training initiatives addressing the nuanced needs of clinical physiologists, prioritizing clinical proficiency, standards, and patient-centered care.

**Providing Expert Consultancy and Advisory Services:** We offer specialized guidance and support to healthcare institutions, academic bodies, and professional organizations, focusing on optimizing clinical physiology practice and improving patient outcomes.

**Cultivating Strategic Partnerships and Collaborations:** We forge alliances with healthcare institutions, research bodies, and professional organizations to advance clinical physiology, facilitate knowledge sharing, and drive innovation.

**Developing and Disseminating Innovative Educational Resources:** We create cutting-edge educational materials, tools, and resources, including textbooks, digital content, and simulation technologies, to support ongoing professional development and excellence in clinical physiology.

**Promoting Interdisciplinary Research and Collaboration:** We facilitate research collaborations between clinical physiologists and experts from other disciplines, fostering innovative solutions to complex healthcare challenges.

**Supporting Continuous Professional Development and Leadership:** We provide opportunities for clinical physiologists to engage in ongoing professional development, leadership training, and mentorship, promoting excellence in clinical physiology practice.

**Providing Advanced Postgraduate Training in Clinical Physiology:** our focus is on providing professional postgraduate training in clinical physiology, equipping clinical physiologists with specialized knowledge, skills, and competencies.

**Delivering Specialized Training in Clinical Physiology Procedures and Interpretation:** We concentrate more on delivering specialized training in clinical physiology procedures and interpretation across various subspecialties.

## Programs and Services:

WACCPS offers a range of programs and services, including:

**Professional Postgraduate training programs:** We offer professional postgraduate training in clinical physiology, equipping clinical physiologists and related discipline with specialized knowledge, skills, and competencies.

**Continuing professional development:** We provide opportunities for clinical physiologists to engage in ongoing professional development, leadership training, and mentorship, promoting excellence in clinical physiology practice.

**Consultancy and advisory services:** We offer specialized guidance and support to healthcare institutions, academic bodies, and professional organizations, focusing on optimizing clinical physiology practice and improving patient outcomes.

**Research collaborations:** We facilitate research collaborations between clinical physiologists and experts from other disciplines, fostering innovative solutions to complex healthcare challenges.

## Benefits

By partnering with WACCPS, individuals and organizations can benefit from:

**Expert education and professional training:** Our programs are designed to provide high-quality education and professional training in clinical physiology.

**Innovative research and collaboration:** We facilitate research collaborations and knowledge sharing, driving innovation and excellence in clinical physiology.

**Professional development and leadership:** We provide opportunities for clinical physiologists to engage in ongoing professional development, leadership training, and mentorship.

We invite you to partner with us in our mission to promote excellence in clinical physiology practice and improve patient outcomes in West Africa.

## VISION

To be the leading professional institution in West Africa for promoting excellence in clinical physiology practice, education, and research, improving healthcare outcomes for the people of West Africa.

## MISSION

To advance the field of clinical physiology in West Africa by providing high-quality education, professional training, and research opportunities, fostering collaboration and innovation, and promoting excellence in clinical physiology practice.

## CORE VALUES

**Excellence:** We strive for excellence in all aspects of our work, from education and professional training to research and practice.

**Innovation:** We foster innovation and creativity in clinical physiology practice, education, and research.

**Collaboration:** We believe in the power of collaboration and partnership to advance the field of clinical physiology.

**Professionalism:** We uphold the highest standards of professionalism in our work, from education and professional training to practice and research.

**Patient-centered care:** We prioritize patient-centered care and strive to improve healthcare outcomes for the people of West Africa.

**Continuous learning:** We believe in the importance of ongoing professional development and lifelong learning for clinical physiologists.

**Interdisciplinary approach:** We promote an interdisciplinary approach to clinical physiology practice, education, and research, recognizing the value of diverse perspectives and expertise.

The professional postgraduate training program offered by WACCPS is focused on providing specialized professional training and certification, rather than a degree or diploma program.

**Key aspects:**

1. **Professional training:** The program provides advanced training and education for provisional clinical physiologists, clinical physiologists and related discipline, focusing on practical skills and knowledge.
2. **Professional certificate:** Upon completion, participants receive a professional certificate, demonstrating their expertise and competence in clinical physiology.
3. **Non-degree program:** This program is not a degree or diploma program, but rather a specialized training program.

**Benefits:**

1. **Focused training:** Participants receive focused professional training and education in clinical physiology, enhancing their professional development.
2. **Practical skills:** The program emphasizes practical skills, clinical exposure and knowledge, preparing participants for real-world applications.
3. **Certification:** The professional certificate awarded upon completion demonstrates expertise and competence in clinical physiology.

WACCPS' professional postgraduate training programThe program is designed to provide advanced training and education for clinical physiologists, equipping them with specialized knowledge, skills, and competencies in clinical physiology. The program is concentrated on professional training and certification, rather than a degree
